

On-Site Service Options

Returns Management & Inventory

Overview

A rise in retail prescriptions parallels a new trend for more severe pharmacist shortage levels, leaving pharmacists and technicians stretched to service customer needs and little to no time to manage returns.

To assist our clients with better resources to lessen administrative time at the pharmacy, CLS MedTurn offers an on-site inventory and returns management program. Through the utilization of a national field team of highly skilled supply chain analysts, a centralized scheduling system, and a technology driven inventory and reporting system, pharmacists and technicians have a timely and cost effective alternative to managing returns and inventory.

Features

Field Team
